

Combo Flash OTG manual

After connected to the smart phone, the top panel will display USB connector connected then follow to show USB mass storage connected.

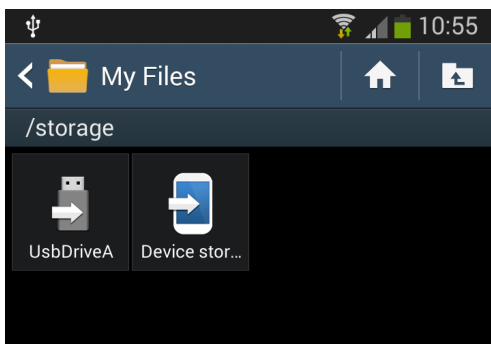

It will automatically load up the file from your SD card.

If in some cases that it does not load automatically, please select 'My Files' then select 'All files'.

After selected 'All files', it will take you to the page below, then select 'UsbDriveA' to read your external memory.

*The description of "UsbDrive" sometimes could state as A, B or others depend on number of devices you have connected.
